

## Revelations' Fill-N-Freeze Is Set To Replace Ice In Home And Restaurant Drinks

Posted for [Revelations Products](#) by [Patrick Gallenberg](#) on August 3rd 2010 and filled under [Food & Beverages](#)

The Fill-N-Freeze recently released by Revelations Products attaches to cups and wine glasses to chill drinks in minutes. The innovative device eliminates beverage dilution and contamination often resulting from ice mixed directly with drinks. It features a unique straw holder that enables beverage consumption when attached, and detaches easily from the drinking vessel. &nbsp; Revelations Products recently launched a promotional campaign for its latest innovation. The multimedia campaign introduces and promotes Fill-N-Freeze, a healthy and versatile alternative for rapidly chilling drinks. Fill-N-Freeze attaches to cups and wine glasses to cool drinks in minutes. The product is designed to eliminate common drawbacks of using ice to chill drinks. Ice added to drinks melts quickly and dilutes the concentration and taste of beverages. Contaminated ice also causes serious illnesses and common discomfort.

Fill-N-Freeze, also known as ICS (Ice Contamination Safeguard) Beverage Chiller, is designed for household and restaurant use. A unique straw holder feature facilitates consumption of beverages once drinks are cooled. The chillers also detach easily from chilled drinking vessels. The chillers come in colorful freezer racks which fit into tight freezer spaces. Fill-N-Freeze is re-usable and dishwasher safe. &nbsp; A small freezer can hold enough Fill-N-Freeze chillers to serve in excess of a hundred people. Restaurants stand to benefit by potentially eliminating the need for expensive wine chillers and ice-makers. Restaurant and bar patrons can enjoy refreshing and undiluted drinks without any fear of ice contamination. Purchasing instructions and additional product information is available at the Fill-N-Freeze website - [www.fillnfreeze.com](http://www.fillnfreeze.com). &nbsp; About Revelations Products
